STICKER STUDIO
HOW TO USE IT

The complete guide for customers, No Limit mechanics, managers and staff.

1 Quick start

2 Designing a sticker

3 Ordering

4 Orders, wear & removal

5 Gallery & Sticker of the Week

6 Merch stickers

7 Mechanics: installing

8 Managers

9 Staff & admins

10 Prices

11 Problems & questions

> The screenshots in this guide use example designs and plates. Everything you see in the city works the same way.

SECTION 1

QUICK START

CUSTOMER Getting a sticker on your car takes five steps:

1. **Open the studio.** Type `/stickers` anywhere in the city, or go to No Limit Customs in Rockford Hills and look at the **Sticker Studio** kiosk with **Left Alt**.
2. **Get a design.** Make your own in the **Design Studio**, or pick a ready-made one in the **Gallery**.
3. **Order it.** Press **Order**, choose your car, the size, the finish and where it goes. You pay from your bank.

4 **Wait for "Ready".** If you made your own design, No Limit checks it first. You get a message when it is approved.

5 **Drive to No Limit Customs.** A mechanic puts it on while you watch. Done!

You can order your own design right away - you do not have to wait for the approval first. If No Limit says no, you get all your money back automatically.

SECTION 2

DESIGNING A STICKER

Open [redacted] and choose **Design Studio** on the left.

The Design Studio: tools on the left, your sticker in the middle, settings for the selected part on the right.

The basics

Add things

Text, **Shape** (12 shapes like flames, stars, lightning, shields and racing stripes) or **Upload picture** (PNG, JPG or WEBP from your computer).

Move, size, turn

Drag a part to move it. Pull a **corner square** to make it bigger or smaller. Drag the **red dot on top** to turn it (hold **Shift** to snap to neat angles).

Edit a part

Click any part. The panel on the right shows everything you can change for it: color, outline, font, size and more.

Start fast

Press **Templates** for 8 ready designs (bumper sticker, race number, club badge, flames...). Change the words and colors to make it yours.

Text tricks

- **19 fonts** - click one in the font list to try it.
- **Outline** and **Shadow** make text easy to read on any car color.
- **Fade to a second color** gives a gradient (for example white to chrome grey).
- **Curve** bends the text into an arch (right) or a smile (left) - great for badges.
- **Letter spacing** spreads letters out for that clean "brand" look.
- Press **Enter** in the text box for a second line.

Sticker shape and background

- **Sticker shape**: Square, Wide, Badge, Bumper (long), Banner (very long) or Tall. Pick this first - it sets how the sticker sits on the car.
- **Background**: **Cut-out** means only your design shows on the car (no box around it). **Color** or **Fade** puts it on a colored panel with rounded corners.
- **Die-cut edge** adds the white border real vinyl stickers have. Turn it off for a "painted on" look, or change its color.

Using your own picture

- After uploading, select the picture and press **Remove white background** to make a white background see-through (perfect for logos).
- **Make it the whole sticker** stretches the picture to fill the sticker exactly - use this if you already made the full design somewhere else.
- **Mirror** flips it left-right.

Handy keys in the studio

Ctrl + **Z** / **Ctrl** + **Y**	Undo / redo
Ctrl + **D**	Duplicate the selected part
Delete	Remove the selected part
Arrow keys	Nudge the selected part (hold **Shift** for bigger steps)

Sending it

1. Give it a name at the top (for example "LS Kings crew logo").
2. Tick **Share in the community gallery** if you want others to be able to order it too.

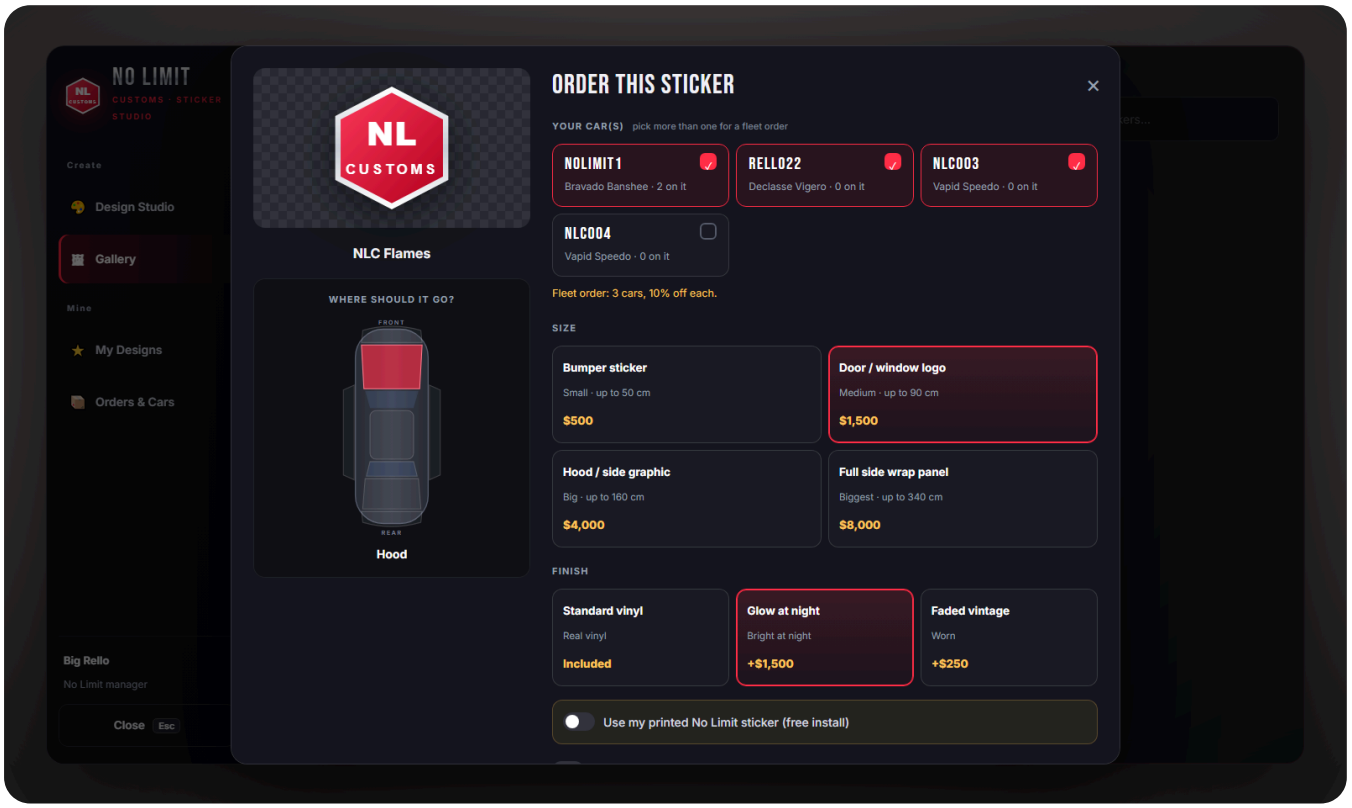

3 Press **Send to No Limit for approval**. It appears in **My Designs** with the label **Waiting for approval**.

Read the design rules first: no hate, nothing explicit, no real-world brand logos you do not own, no fake police or EMS markings. You can have up to 5 designs waiting at once.

SECTION 3

ORDERING

Press **Order** on any design (in the Gallery or in My Designs). The order window opens:

The order window: pick cars, size, finish and the spot on the car diagram. The total updates as you go.

1. **Which car?** - all your cars are listed, plus 📍 **the car next to you**. Tick one of yours, or several of yours for a fleet order (3+ cars = 10% off each). Picked a car that is not yours? Its owner gets a message and must say yes in **Orders & Cars** → **Requests for your car** (a No Limit manager approves cars with no owner). If they say no, you get your money back.

2. **Size** - Bumper sticker, Door / window logo, Hood / side graphic, or Full side wrap panel.

3. **Finish** - Standard vinyl, **Glow at night** (stays bright after dark) or **Faded vintage** (sun-worn look).

4. **Where should it go?** - click a part of the car diagram (hood, roof, sides, bumpers, trunk, rear window). Click it again for "Let No Limit choose".

5. **Matching sticker on both sides** - one on each side of the car (costs double).

6 **Notes** - anything for the mechanic, like "just behind the front wheel".

7 Press 👁 **Preview on my car** to see it on your car first (stand next to your car). Use ← → to walk around it, mouse wheel to zoom, **Backspace** to go back.

8 Press **Place order**. The money comes out of your bank.

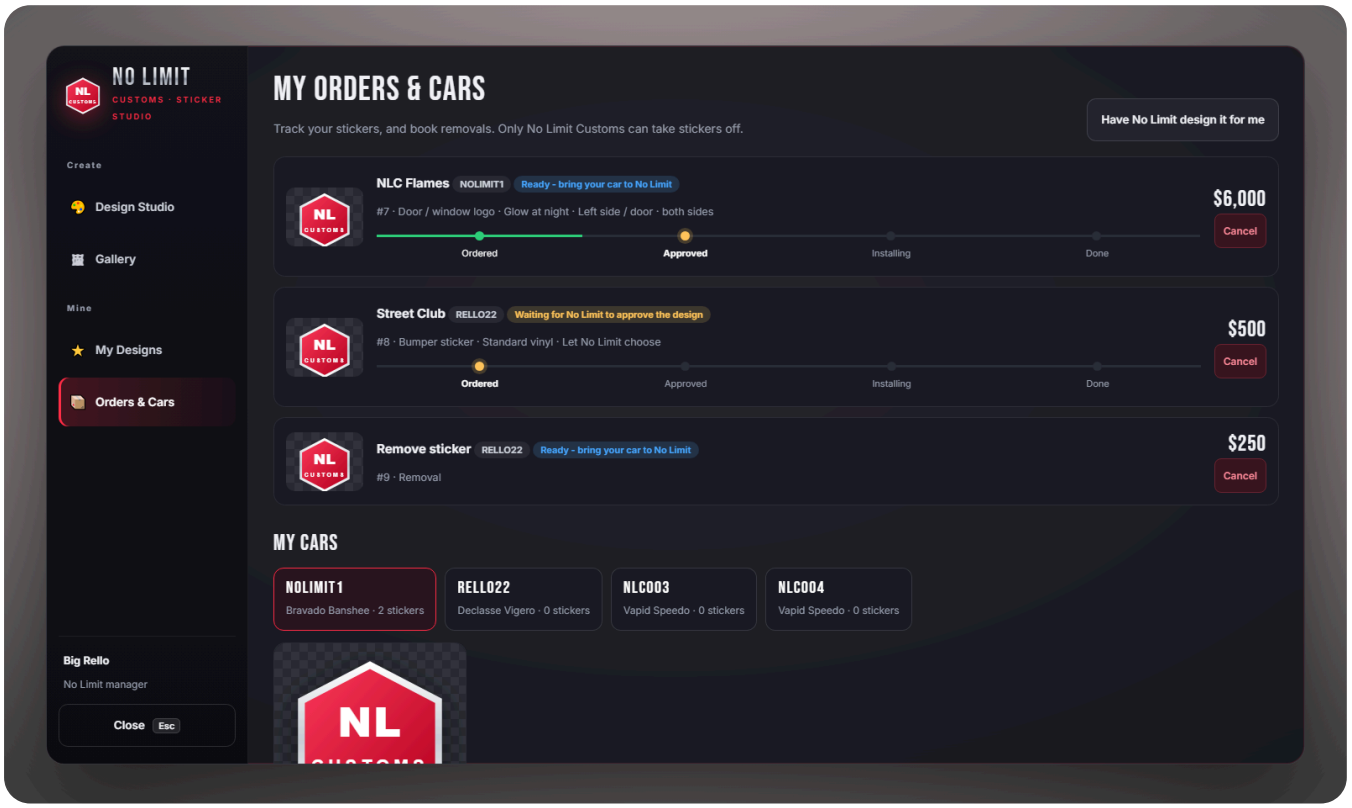

"Have No Limit design it for me"

No idea how to design? In **Orders & Cars** press **Have No Limit design it for me**, describe what you want in the notes (colors, words, style), and No Limit makes it for you. This adds a $1,000 design fee.

SECTION 4

ORDERS, WEAR & REMOVAL

Open **Orders & Cars** to follow every order.

Each order shows where it is: Ordered → Approved → Installing → Done.

STATUS	WHAT IT MEANS
Waiting for No Limit to approve the design	A manager still has to check your design.
No Limit is designing it	You asked No Limit to design it - they are working on it.
Ready - bring your car to No Limit	Drive to No Limit Customs, any mechanic can put it on.
Being installed right now	A mechanic is working on it.
Done	It is on your car.
Design not approved - refunded / Cancelled - refunded	You got your money back.

You can **Cancel** any order that is not being worked on yet - you get your money back (and your merch sticker, if you used one).

Your cars, wear and refresh

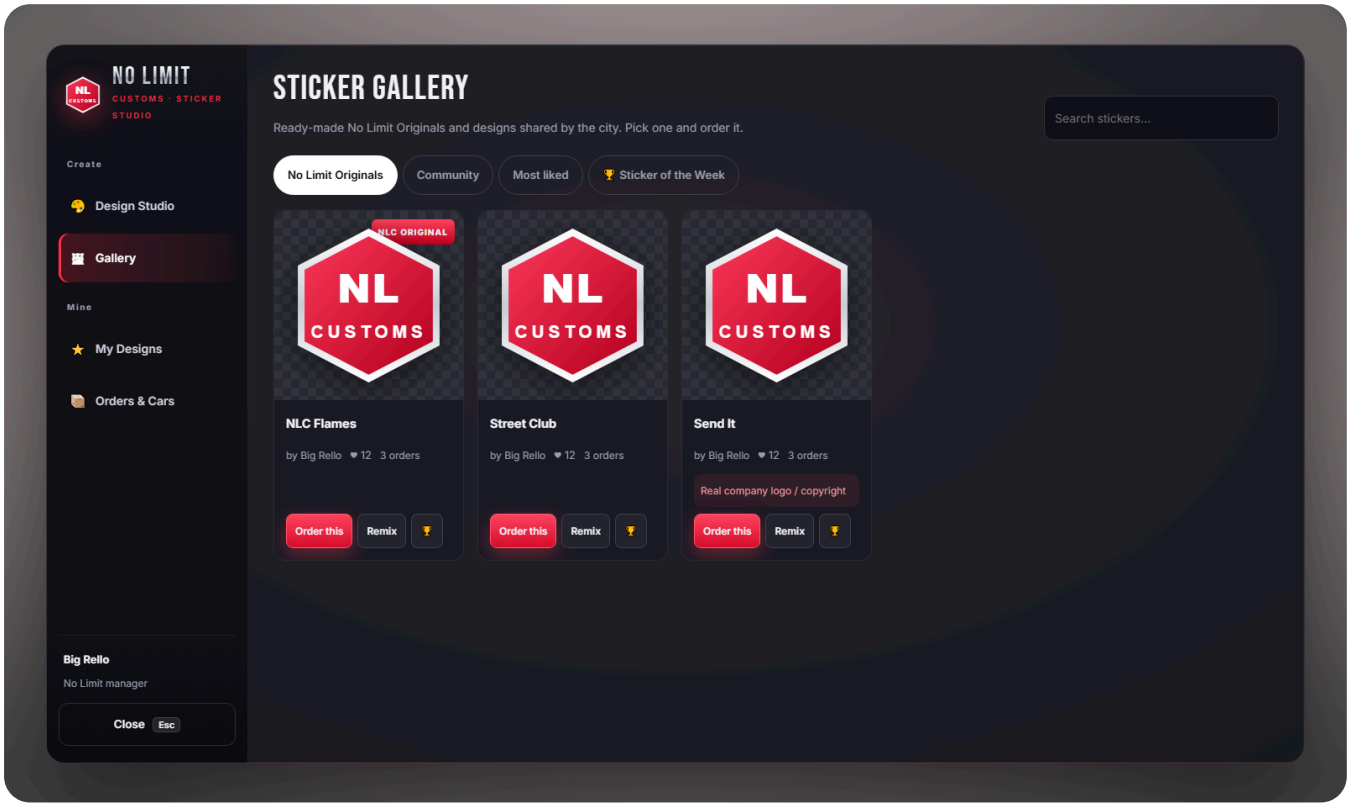

Under **My cars**, click a car to see every sticker on it.

- Each sticker shows how **fresh** it is. Stickers slowly fade over about a month, just like real vinyl.
- When it starts looking worn, a **Refresh** button appears. A refresh costs 40% of the size price and makes it look brand new again.
- **Book removal** ($250) if you want a sticker taken off. Only No Limit Customs can remove stickers - other shops and repaints can not.

> Stickers stay on the car (by plate) through garages, server restarts and even when you sell the car.

SECTION 5

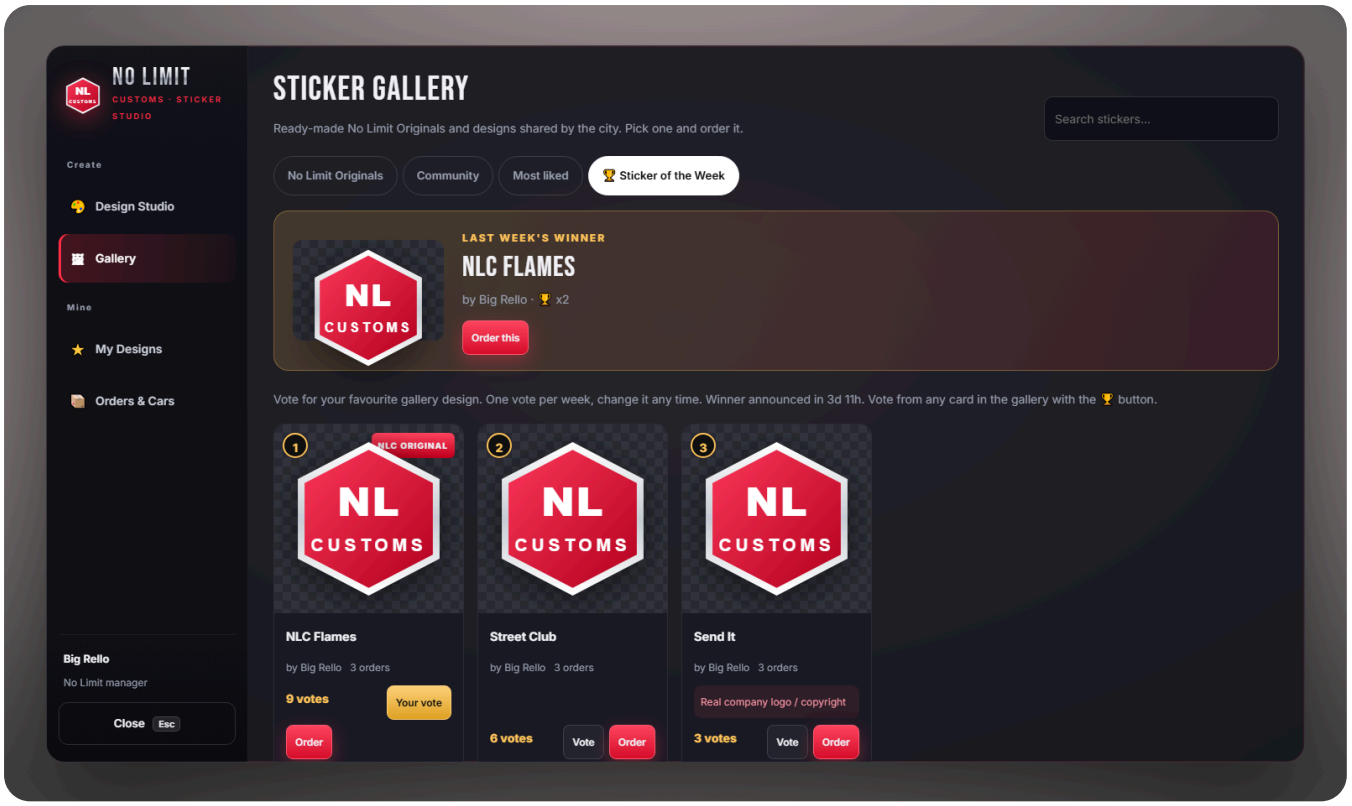

GALLERY & STICKER OF THE WEEK

The Gallery: No Limit Originals, Community designs and Most liked.

- **No Limit Originals** - designs made by the shop.
- **Community** - designs other players shared.
- ♥ to like a design, **Order this** to put it on your car, **Remix** to open it in the studio and add your own touch.
- Click any picture to see it big.

🏆 Sticker of the Week

Vote for your favourite. The winner is announced to the whole city every Monday.

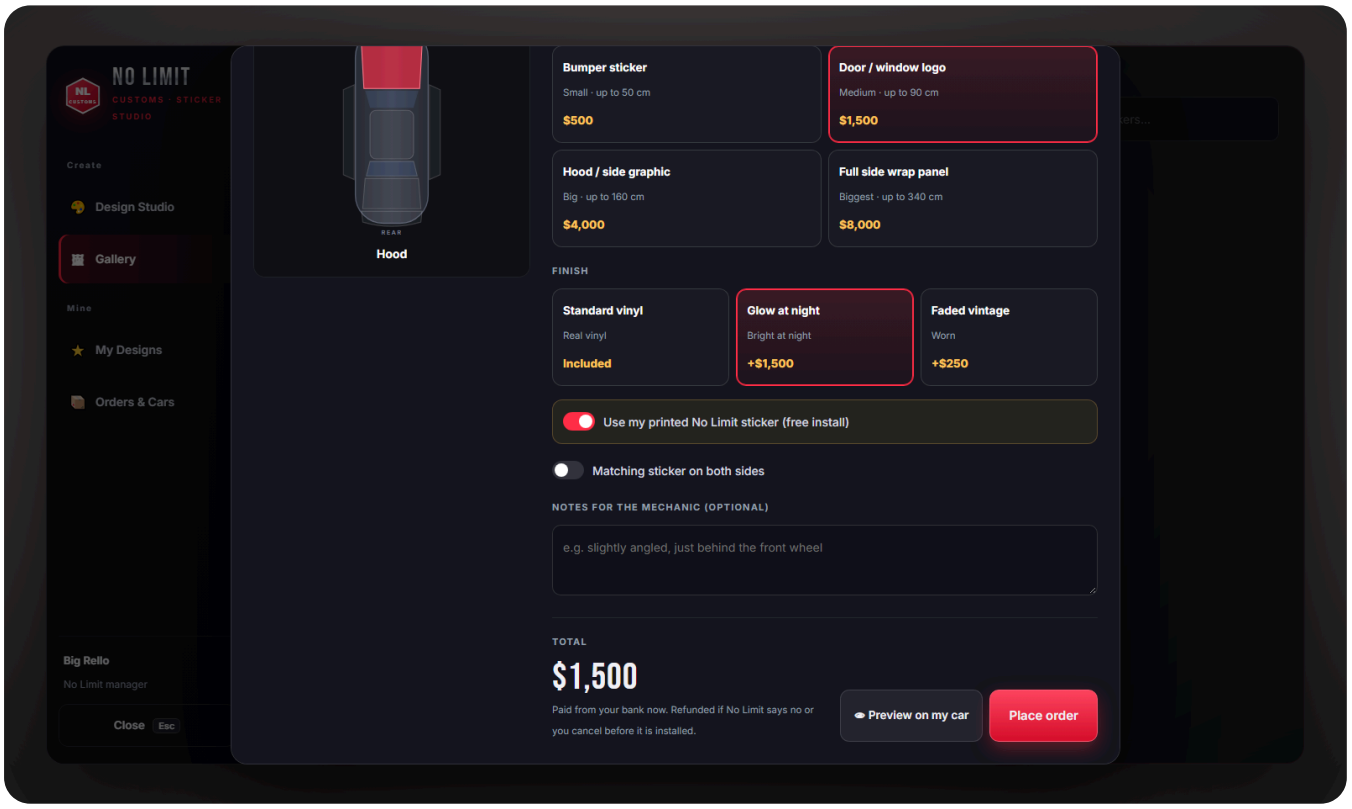

- Press the 🏆 button on any gallery design to vote for it. You get **one vote per week** and can change it any time.
- You can not vote for your own design.
- Every Monday the winner is announced in chat to everyone and the design gets a trophy (🏆 x1, x2...).

SECTION 6

MERCH STICKERS

No Limit can print designs as **sticker items** (they show in your inventory as "No Limit sticker"). You can buy them from No Limit, trade them, or collect them.

1. **Use** the sticker item from your inventory. The studio opens with that design ready to order.
2. The switch **Use my printed No Limit sticker (free install)** is on. Pick your car and spot.
3. The sticker itself is **free** - you only pay for a special finish (glow or vintage) if you want one.
4. Bring the car to No Limit like any other order.

Using a merch sticker: the install is free, only the glow finish is paid here.

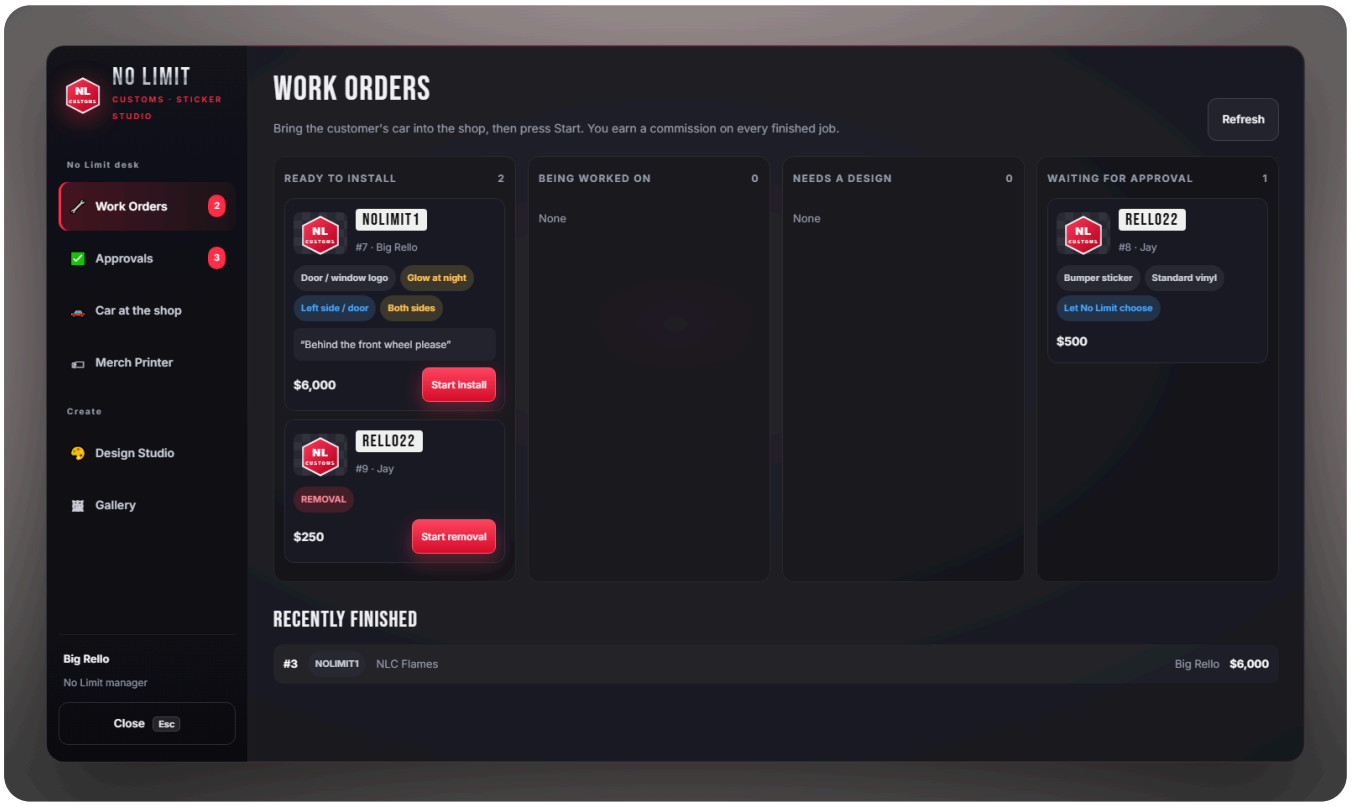

SECTION 7

MECHANICS: INSTALLING STICKERS

NO LIMIT EMPLOYEE You need the No Limit Customs job and to be **on duty**.

Open the desk

Type [redacted], or look at the kiosk with **Left Alt** and choose **No Limit desk**.

Work Orders: Ready to install, Being worked on, Needs a design, Waiting for approval.

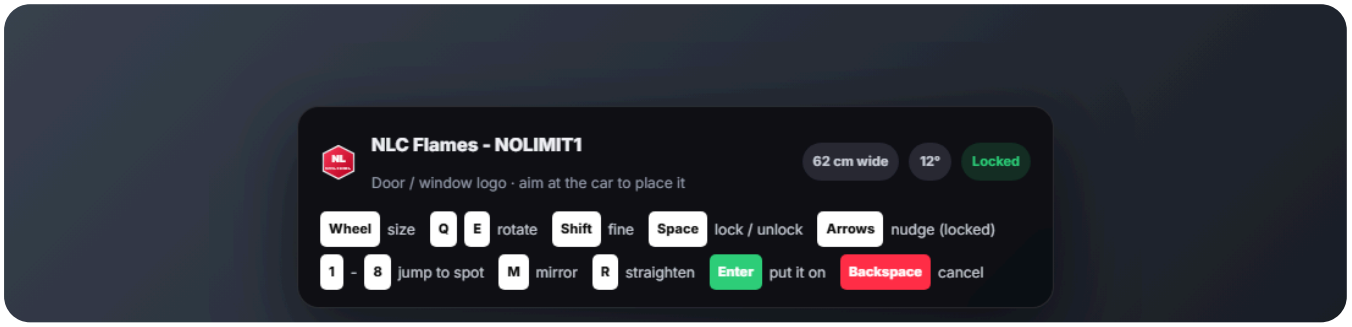

Putting a sticker on

1. Make sure the customer's car is **at No Limit Customs** (inside the shop area) and you are standing next to it.
2. In **Work Orders**, find the card with that plate under **Ready to install** and press **Start install**.
3. The window closes. **Aim at the car** - the sticker follows your aim and bends with the body. If the customer picked a spot, it starts there.

4 Get it perfect with the keys below.

5 Press **Enter** (or left click) to put it on. Your character walks to the car, cleans the panel and applies the sticker. Everyone nearby sees it sweep on.

6 For a **both sides** order, the matching spot on the other side is lined up for you - adjust if needed and press **Enter** again.

The help box at the bottom of your screen while placing.

KEY	WHAT IT DOES
Aim (mouse)	Move the sticker over the car
Mouse wheel	Make it bigger / smaller (within the size the customer paid for)
Q / **E**	Turn it
Shift	Hold for fine control (slower size, turn and nudge)
Space	Lock it in place / unlock (so you can look around without moving it)
Arrow keys	Nudge it along the panel (when locked)
1 - **8**	Jump to a spot: 1 left side, 2 right side, 3 hood, 4 roof, 5 trunk, 6 rear bumper, 7 front bumper, 8 rear window
M	Mirror the picture (left-right)
V	Flip it upside down
R	Straighten (rotation back to 0)
Enter / left click	Put it on
Backspace / right click	Cancel (the order goes back to Ready)

> Easiest way: press a number key to jump to the spot, **Space** is already on, then use the mouse wheel and arrows to fine-tune. Check it from a few angles before pressing Enter.

From the Service Desk

No Limit's **Service Desk** ([redacted]) has a 🧐 **Stickers** tab with a number showing how many sticker jobs are waiting. Every sticker job is there: **Ready to install**, **Being worked on** and **Waiting**. Press **Start** on a card and the desk closes and the install begins, exactly like from the sticker desk. **Open full sticker desk** and **Approvals** jump straight into the sticker desk.

Fixing a sticker that is already on (Adjust)

1. Open `/nlcshop` → **Car at the shop** → **Check the car next to me**.
2. Press **Adjust** on the sticker. It lifts off and follows the same placing keys: aim to move it anywhere on the car, **1** - **8** to jump to another part, wheel to resize, **Q** / **E** to turn, **M** mirror, **V** upside down, arrows to nudge.
3. Press **Enter** - your character smooths it into the new spot. Free, any mechanic.
4. Put it on completely wrong? Any mechanic can **Remove** it within 2 hours of putting it on (managers any time) and put it on again.

Customers can book **Fix position (free)** on any sticker in **Orders & Cars** → **My cars**; it shows on the work board as **MOVE / FIX**.

Refresh and removal jobs

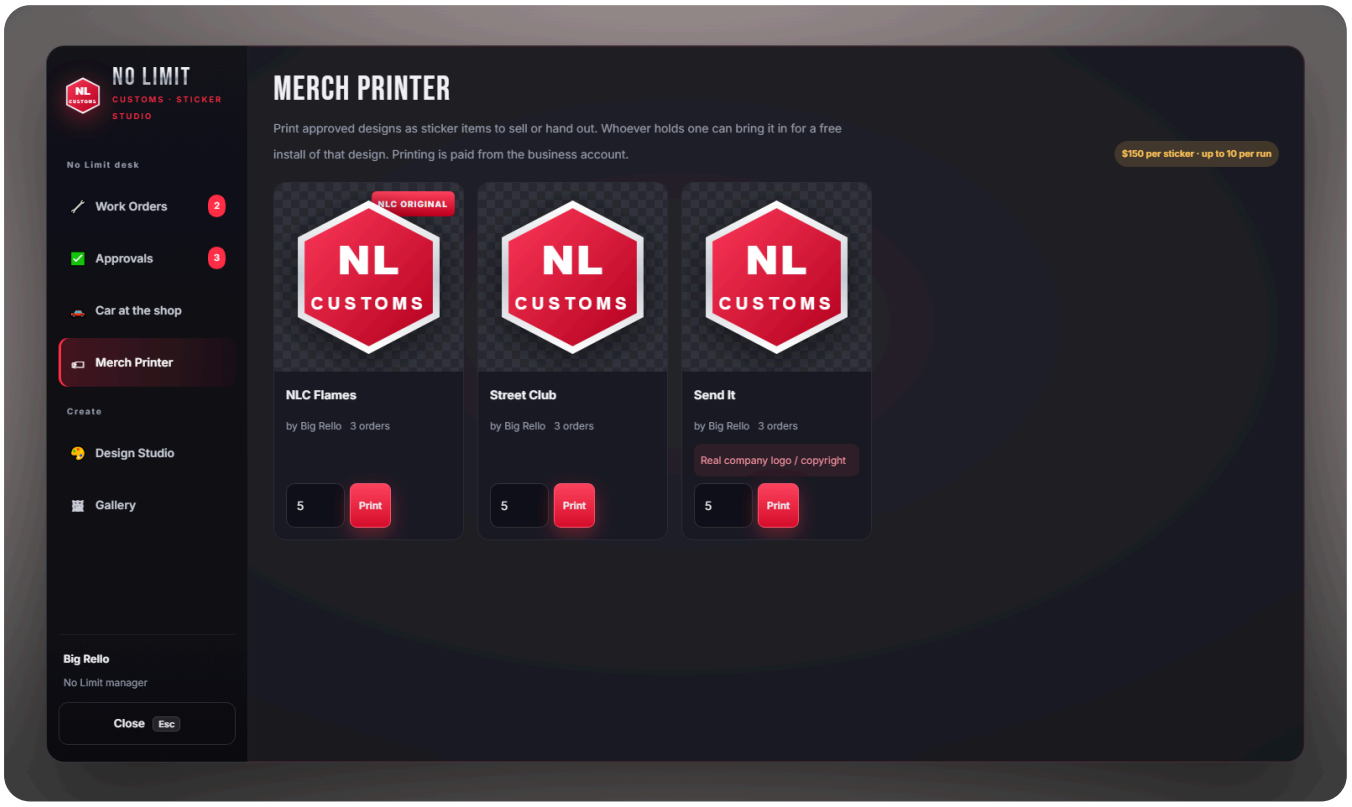

- Booked jobs show on the board with a **REFRESH** or **REMOVAL** tag. Press **Start refresh** / **Start removal** next to the car.
- You can also open **Car at the shop**, press **Check the car next to me** and press **Do booked removal** / **Do booked refresh**.

Design requests

1. Read the customer's notes on the card under **Needs a design**.
2. Make the design in the **Design Studio** and press **Save as No Limit Original** (a manager has to do this save).

3 Back in Work Orders, press **Attach a design** on the card and pick it. The order becomes Ready (for fleet orders, every car at once).

Merch Printer

Print approved designs as sticker items to sell.

Open **Merch Printer**, set how many (1-10) and press **Print**. Each sticker costs **$150 from the business account** and lands in your pockets. Sell them for whatever you like.

Getting paid

When you finish an install, refresh or removal, you get **15% of the order** straight into your bank. The other 85% goes to the No Limit Customs business account.

SECTION 8

MANAGERS

RANK 4 AND UP / BOSS

Approving designs

1. Open `/nlcshop` → **Approvals**. A red number on the menu shows how many are waiting.
2. Click a picture to see it big. Check for hate, explicit content, real company logos and fake police/EMS markings.
3. Press **Approve**, or **Say no** and pick a reason (you can add a note for the customer). Saying no refunds the customer automatically.

> A yellow "Has uploaded picture" tag means the customer uploaded their own image - look at those extra carefully.

Other manager tools

No Limit Originals

In the studio, press **Save as No Limit Original**. It is approved straight away and shows in the gallery under No Limit Originals.

Free shop install

Car at the shop → **Free shop install**: put a No Limit Original on any car for free (promo cars, the shop's own fleet).

Remove / refresh now

On **Car at the shop** you can remove or refresh any sticker for free, without a booking - for mistakes or rule-breaking stickers.

SECTION 9

STAFF & ADMINS

STAFF

Turning it on

The resource is [redacted] (in [redacted] on Main and Dev). In the txAdmin console: [redacted] then [redacted]. On Main it also starts by itself with every restart. The database tables are made automatically.

Moderation

- Staff (admin/god) can open [redacted] → **Approvals** even without the job.
- [redacted] removes every No Limit sticker from a car instantly (works in the txAdmin console too).
- **All stickers in the city** (bottom of the Settings page): search by plate, design or creator, remove one sticker, or **remove all by creator** in one go.
- Emergency vehicles can never get stickers (switch in Settings), and you can block more cars by spawn name.
- [redacted] now shows a "No Limit stickers" line for the car you are in.
- Vehicle Manager → Insights → History (search a plate) lists every sticker installed, refreshed or removed.

Changing settings in game

1. Type `/nlcsettings` (or open `/nlcshop` and press ⚙ **Settings**). Staff only - you do not need the No Limit job.

2. Change anything: prices, sizes (in cm), finishes, fees, commission, approval rank, fleet discount, wear speed, weekly prize, merch cost, upload limits, kiosk and install-area positions, draw distance and animation times. Every field shows its default.

3. To move the kiosk or the install area, stand where you want it and press 📍 **Use my position** (or **+ Add one where I stand**).

4. Press **Save settings**. It applies to every player right away - no restart. If one value is wrong, nothing is saved and it tells you which.

5 **Reset to default** puts everything back to config.lua. Every change is logged with who made it.

The **Advanced** box (job id and business bank account) should only change if the shop moves to a different job. A wrong value locks employees out until it is fixed.

All settings (defaults from config.lua)

SETTING	DEFAULT	WHAT IT DOES
[redacted]	$500 / $1,500 / $4,000 / $8,000	Prices and maximum size of each sticker size
[redacted]	+$0 / +$1,500 / +$250	Finish prices
[redacted] / [redacted]	$250 / $1,000	Removal and "design it for me" fees
[redacted]	0.15	Mechanic's share of each finished job
[redacted]	4	Rank needed to approve designs
[redacted]	12	Stickers allowed per car
[redacted]	10 cars, 10% off from 3	Fleet order limits and discount
[redacted]	30 days, refresh 40%	How fast stickers fade and refresh price
[redacted]	0	Cash for the Sticker of the Week creator (0 = trophy only)
[redacted]	$150 per print, max 10	Merch printing cost and run size
[redacted] / [redacted]	Rockford Hills	Where installs are allowed and where the kiosk is

Everything in this table can be changed in game with [redacted]. Commands and kiosk only - no default keys are bound (AGN rule).

SECTION 10

PRICES

ITEM	SIZE	PRICE
Bumper sticker	up to 50 cm	$500
Door / window logo	up to 90 cm	$1,500
Hood / side graphic	up to 1.6 m	$4,000
Full side wrap panel	up to 3.4 m	$8,000
Glow at night finish		+$1,500
Faded vintage finish		+$250
Both sides		x2
Fleet order, 3+ cars		10% off each
No Limit designs it for you		+$1,000
Refresh		40% of the size price
Removal		$250
Merch sticker install	door logo size	Free (finish extra)

SECTION 11

PROBLEMS & QUESTIONS

PROBLEM	WHAT TO DO
"Only No Limit employees on duty can use the desk"	Clock in on duty with the No Limit Customs job first.
"Bring the car with plate ... next to you first"	The car has to be out and within a few metres of the mechanic.
"The car has to be at No Limit Customs"	Drive the car into the shop area in Rockford Hills.
"That car is full"	12 stickers max per car (open orders count too). Book a removal first.
"You can only order stickers for your own cars"	The car must be registered to your character.
"You need $... in the bank"	Orders are paid from your bank account, not cash.
My uploaded picture won't send	Use PNG, JPG or WEBP. Very detailed designs are shrunk automatically; if it still fails, use a smaller picture.
"Please wait ... seconds"	You can send one design every 15 seconds.
I don't see a sticker on a car	Stickers show within about 45 m (far cars only show 2). Get closer and give it a second to load. Check you did not turn on **Hide stickers for me** ([redacted]).
My PC struggles at car meets	Type [redacted] or tick **Hide stickers for me** in the studio. Only you stop seeing them.
"Emergency or blocked vehicle"	Police, EMS and fire vehicles (and any car staff blocked) can not get stickers.
Can someone else remove my sticker?	Only No Limit Customs (with your booking, or a manager for rule-breaking stickers). Repaints and other shops do not remove them.
What if I sell my car?	The stickers stay on it - they belong to the car.

No Limit Customs is owned by Big Rello. Questions? Ask a No Limit employee in the city or open a ticket.
